

ALAMOD project: Building a database on long-term trials in tropical regions

Issiakou Alladé Houssoukpèvi - INRAE Info&Sols, Orléans

My mission in the ALAMOD project

WP1 : Selection and upgrading of datasets to be integrated into the data repository

Organise and collect data from long-term trials under tropical conditions

about 20 trials identified

Evolution of SOC and N stocks
Yields
Crop management
Soil properties
Metadata
Climatic

Harmonising collected data and estimating missing data

Contribute to the writing of articles (especially data papers), reports and communications

Taking part in ALAMOD project working groups on the choice of repositories to be included in the data portal to be developed as part of the project

Interacting with the team in charge of developing the project's data portal, in order to describe the data and metadata
